DESCRIPTION

Based on the last LAND ROVER DEFENDER models built and registered between 2012 and 2016, JLR CLASSIC WORKS UK in Coventry has carefully dismantled each individual vehicle and fitted it with a 5.0-litre V8 petrol engine (403 PS) – a Range Rover engine to the 2015 specification – combined with the modern 8-speed automatic gearbox from ZF. The high-performance brakes from Alcon and the suspension, featuring Bilstein dampers and Eibach springs developed specifically for the WORKS V8, are tailored to the vehicle's performance. Features include: 18-inch Saw Tooth LM alloy wheels with BF Goodrich All-Terrain tyres, air conditioning, ABS with ETC & DSC, LED headlights, central locking, Recaro front seats, 7-seater package, electric front windows, heated front seats, aluminium door handles. The interior has been transformed into a very high-quality leather interior with Recaro sports seats, and the Jaguar Land Rover Classic audio system with Bluetooth and navigation has been fitted. The result is a motoring masterpiece. A collector's item straight from the factory. Every left-hand-drive WORKS V8 sold for the European market passes through the hands of our specialists at JLR CLASSIC DEUTSCHLAND in Essen, where it is thoroughly inspected, test-driven and, with the assistance of the TÜV, issued with new German

vehicle documents and a one-day registration following a full inspection.
